

Who Ever This concerns ,

I think Broadband Over Power Line is a bad choice for us. I am a Ham operator . I think that we have enough choices on how get on the internet. I am against BPL and I would like to see BPL taken off the market.I am now In a Beta area where BPL is Tested and I Have So much interence in My Amatuer Radio I can Barely use it.Amatuer Radio is used in so many different ways. We help in Snow storms ,Thunderstorms,Tornados,and other diasters.If we have BPL around us how are we going to help every body if we cannot receive signals . We don't know what else BPL is going to do with police and other emergency Transmissions.I hope you would look in the right way and make the right decision on BPL . You as the FCC can only help Us On this concern. Do We have to have BPL ? BPL is not right for The USA . I am Against BPL ,Hope you will help and consider what I have said . Thanks, Chad Herring
